ABOUT

An accomplished and meticulous .NET developer, I have over a year of experience in designing, developing and deploying dynamic web applications and services. I am proficient in ASP.NET Core, C#, MVC and SQL Server technologies, and have a passion for delivering efficient and scalable software solutions. I am seeking to join an innovative organization where I can utilize my technical expertise in .NET development, contribute to impactful projects, and develop my skills in a collaborative environment. I believe that challenges are opportunities for growth, and I look forward to contributing to new successes with an enthusiastic team.

EDUCATION

Bachelor's degree in computer science from Misr Higher Institute for Commerce & Computers

INTERNSHIP

DEPI "Digital Egypt Pioneers Initiative", .NET Web Development

PROJECTS

E-Commerce API & MVC

Developed a scalable ECommerce API with .NET, integrating JWT authentication and role-based access. Designed a generic repository pattern to optimize data access. Implemented core features: product, Category, cart, payment, Wishlist, and role-based account management. Created a secure payment gateway (Strip), optimized endpoints, tested and debugged thoroughly, and documented for seamless integration and usability. GitHub Repo

Library Management System

Using C#, .NET Framework, and ADO.Net Core, I Developed a comprehensive Library Management System that streamlines library operations, including user management, book cataloging, borrowing and returns, and reporting. Implemented efficient data handling and interaction using ADO.Net Core for database connectivity. Key features included a user-friendly interface for administrators and members, and search functionality.

TECHNICAL SKILLS

- Languages: C#, JavaScript
- Frameworks: ASP.NET Core API & MVC, .NET Framework, Entity Framework, Entity Framework Core, LINQ, ADO.Net Core.
- Web Technologies: HTML, CSS, Bootstrap, RESTful Apis, AJAX, jQuery
- Databases: SQL Server, MySQL
- Tools: Visual Studio, Git, Postman
- Core Skills: Object-Oriented Programming (OOP), MVC Architecture, N-Tier Architecture, Clean Architecture, CQRS Pattern, debugging, Design pattern, SOLID Principles Understanding of JWT authentication, role-based access control.

SOFT SKILLS

- Problem-Solving.
- Attention to Details.
- Team Collaboration.
- Time Management.
- Continuous Learning.
